PROJECTS

HomeScholar
Product Owner
- https://homescholar.herokuapp.com/
- Application made for homeschooling parents that desire to get organized in their homeschooling efforts. Users can create assignments, build out a calendar, and transcripts are auto-filled to keep track of progress made.
- Built in collaboration with 3 other software developers,
- Full Stack Application with a focus on team collaboration.

Keepr
Lead Developer
- https://github.com/TroyFuhriman/keepr-final(placeholder until deployed)
- Inspired by Pinterest. Users can create "keeps" to put into their "vault" and share these keeps with others.
- Final Project for Codeworks
- Emphasis on individual programming
- Full Stack Application focusing on using C# and MySQL

4Sight
Partner/Collaborator
- https://use4sight.herokuapp.com/
- A "trello" inspired application where users can create boards and collaborate with other users to create tasks, lists and comments to help complete projects in an organized manner
- Built with a focus on partner programming
- Full Stack Application utilizing VueJs, NodeJs, and MogoDb

PROFILE

Full-stack software developer with strong problem-solving skills and a good sense of user interface. Well-rounded in both server development as well as front-end styling. Excellent people skills with a strong desire to bring an uplifting culture to team collaboration and a drive to truly make a difference. Background in psychology, sales, and customer service lends to the ability to build great relationships with client, coworkers, and consumers. Passionate about ensuring that all parties are not just satisfied with end product but enjoy the process of collaboration and development.

EXPERIENCE

Software Development Student, Codeworks   04/2020-07/2020
- 13 week immersive flagship course completed 500+ hours learning and utilizing best practices in software development
- Built many full stack applications
- Implemented Scrum in planning out team projects
- Collaborated weekly to implement partner programming
- Effectively used MVC pattern in applications

Server, Abuelos Mexican Restaurant 08/2012-07/2013
- Gave quality customer service by maintaining a high standard of timely service. Worked closely with coworkers to support each other in this pursuit.
- Participated in team competitions to up-sell customers on premium products
- Trusted to deescalate situations if a customer became upset with the current level of service from their original server

Sales Representative, BioGuard Pest Control 05/2011-08/2012
- Worked individually to build customer presence in a new area
- Explained services in a way that helped customers to never have surprises, which led to a 20% higher than average customer retention rate

Full Time Missionary, Church service 04/2008-04-2010
2 years in service to the community
- Leadership positions for 18+ months. Took the lead in meetings, collaborated to set weekly and monthly goals for the team. Provided detailed progress reports weekly.
- Help others set daily and weekly progress goals and accomplish them.
